

MOLD CHUTES™

IPS Mold Chutes™ stop your moldings from scattering randomly in the "drop zone". They ensure your parts land on your conveyor or in your packing case and not on the floor.

Mold Chutes are made of durable plastic and are of rugged construction. The inserted hard PVC lining in the bottom is held in place with nylon screws that protect even the most delicate molding. The material used in the construction will not absorb oil or grease and is abrasion, puncture, and tear resistant. Each **Mold Chute** is easily cleaned using simple household cleaners. There are no concertina folds to trap moldings or dirt. **Mold Chutes** come in 18 standard sizes with in-line or side exit delivery chutes when your parts have to change direction. We also offer Straight and Tapered Mold Skirts .

Some Benefits of Mold Chutes:-

- Reduce Scrap • Eliminate Contamination • Increase Profits
- Easy Installation • Quick Access to the Mold • Movable to Other Presses

Mold Chutes are available in standard sizes from 8" to 24" mold width. Special sizes are available for a small surcharge and can be ready in 2 weeks from receipt of order. Phone our technical support for your free installation guide and user notes.
